# Lucas Rossoni Dieder

**Software Developer | Java | Spring Boot | Python**

Jardim Paulista, São Paulo, SP, Brazil | lucas.rossonidd@gmail.com | +55 11 97792-3704 | LinkedIn | GitHub | Portfolio

## Professional Summary

Software developer focused on backend development, with an interest in applying software engineering to artificial intelligence. I have hands-on experience with Java, Spring Boot and Python, building APIs and integrating services. I am committed to continuous learning: I study and explore technologies, improve my solutions and share knowledge with the team. I aim to deliver reliable software and grow alongside my colleagues, with attention to business needs and software quality.

## Technical Skills

**Backend:** Java 17+, Spring Boot, Spring Modulith, Spring Security, Spring Data JPA/Hibernate, REST APIs, Python, FastAPI

**AI:** LLMs, RAG, Gemini API, Prompt engineering, Embeddings, Semantic search, ChromaDB, Streamlit

**Databases:** PostgreSQL, MySQL, Oracle Database, Flyway

**Testing and cloud:** JUnit, Mockito, MockMvc, Testcontainers, pytest, Docker, OCI, Terraform, GitHub Actions, CI/CD, Linux

**Collaboration and tools:** Git, GitHub Projects, Kanban, Jira, Pull Requests, Code Review, Codex and AI agents

**Additional technologies:** React, TypeScript, Angular

## Professional Experience

### Backend Developer - Freelance — Céu de Lavanda (September 2026 - Present)

- Develop Lavanda Flow to manage inventory and production for Céu de Lavanda using Java 25, Spring Boot and REST APIs.
- Implement batch, expiry and stock movement control, with FEFO to prioritise batches that expire first and support production traceability.
- Apply stock consistency rules, PostgreSQL persistence and Flyway migrations; organise delivery with GitHub Projects, pull requests and automated tests.

## Education

**Systems Analysis and Development** — FIAP (Started: 2025 | Expected graduation: November 2027)

## Software Engineering Projects

### EnergiAI - Oracle ONE + Alura Hackathon (2026)

- Developed Java and Spring Boot APIs integrated with the model through FastAPI, with a rule-based fallback to keep analysis available when the ML service fails.
- Reviewed data quality and the modelling pipeline, identifying validation issues and recommending tests for invalid inputs.
- Implemented security, tests and CI/CD, and provisioned OCI infrastructure with Terraform; the backend was validated with 266 passing tests.

### Knowledge Assistant with RAG | ONE Challenge

- Developed a Python application using RAG, Gemini and ChromaDB to answer questions based on fictional corporate documents.
- Implemented sourced answers and fallback when relevant context is unavailable; wrote pytest tests and deployed the application to OCI with Docker.

## Certifications

- Oracle Cloud Infrastructure 2025 Certified Foundations Associate (2025)
- Oracle Cloud Infrastructure Certified AI Foundations Associate (2026)

## Languages

**Portuguese:** Native

**English:** Intermediate (B1)
